

AUDIO VISUAL SOLUTIONS FOR EDWARDS AIR FORCE BASE IN CALIFORNIA

OBJECTIVE Officials at Edwards Air Force Base in Southern California were interested in procuring a comprehensive video conferencing solution that included high-definition video, voice and content sharing for a conference room on the site.

SOLUTION VectorUSA installed a TAA-compliant Polycom HDX 8000-1080 video conferencing unit, a Polycom Eagle Eye III HD camera and HD microphone, and a Polycom Sound Station IP 7000 HDX conference phone. A single interface was used for both video and voice calls to make communication and collaboration easier and more intuitive. To complete the conference room collaboration solution, VectorUSA installed two 65-inch flat panel display screens, established communication cabling pathways, connected all cables, and tested the system to ensure it met Edwards Air Force Base specifications.
